

OBJECTIVE

I am a motivated and detail-oriented Web Developer with a bachelor's degree in computer application and strong foundational knowledge in front-end and back-end development. I am passionate about building user friendly, efficient, and responsive websites. I am seeking a dynamic role where I can apply my problem-solving and teamwork skills to create impactful digital solutions.

Rithika R

WEB DEVELOPER

I am a Web Developer skilled in HTML, CSS, and PHP. I create and style responsive websites with clean layouts and user-friendly designs. Using PHP, I build dynamic features like forms, logins, and database-driven content.

PROJECTS

1. Personal Portfolio Website

A fully responsive and visually engaging personal portfolio website designed to showcase web development projects, skills, and professional background. This website serves as a digital resume and central hub for potential employers or clients to learn more about me.

Key Features:

- Responsive Design: Optimized layout for mobile, tablet, and desktop devices.
- Project Showcase: Dynamic sections for highlighting individual projects with descriptions and links.
- Skills Section: Categorized skill listings with visual progress bars or icons.
- Smooth Navigation: User-friendly interface with scroll animations and navigation menu.

TECH USED: HTML, CSS, PHP

2. Simple Contact Form with Backend Validation

A functional contact form system built with PHP to handle user inquiries effectively and securely. Integrated with form validation and backend error handling to ensure proper data input before submission.

Key Features:

- User-Friendly Interface: Clean and accessible design using HTML/CSS.
- Backend Validation: PHP-based input validation to prevent empty fields, incorrect email formats, and malicious inputs.
- Error Handling: Clear error messages for user guidance and successful submission confirmation.
- Email Integration (Optional): Configurable to send form submissions to a designated email address.
- Security Measures: Basic sanitization to prevent injection attacks and misuse.

TECH USED: HTML5, CSS3, PHP
