

MAGESHWAR S.V

Software Engineer

I am a B.Tech IT student with expertise in a wide range of technologies, including C, Python, Java, HTML, CSS, JavaScript, and cloud computing. I have strong skills in embedded systems, ethical hacking, software testing, UI/UX design, and no-code app development. With a keen interest in Web Development, Machine Learning, IoT, and hardware engineering, I am committed to improving my knowledge and skills to contribute to innovative tech solutions. My goal is to leverage my technical skills to make an impactful difference in the technology sector.

EDUCATION

B.Tech Information Technology Kings Engineering College

10/2021 - 05/2025

Chennai, India

SSLC and HSC

P.C.K.G.Government Higher Secondary School

03/2018 - 03/2021

Chennai, India

WORK EXPERIENCE

Web Development Intern Internpe

06/2023 - 07/2023

Online

Achievements/Tasks

- Completed a **Web Development Internship**, where I gained practical experience and developed skills in **HTML**, **CSS**, and **JavaScript**.

Web Development Intern Tecvesten Consulting LLP

02/2025 - 04/2025

Offline

Achievements/Tasks

- Completed a Web Development Internship, where I gained practical experience in designing and coding websites using Zoho Sites.

Web Development Intern Branups

05/2025 - Ongoing

online

Achievements/Tasks

- Developed responsive and high-performance websites using WordPress, HTML, CSS, and JavaScript.

Team Lead, Smart India Hackathon Kings Engineering College

04/2022 - 04/2024

Chennai, India

Achievements/Tasks

- Smart Pipeline Leakage Detection** - Developed a system to detect pipeline leakages using IoT sensors and real-time monitoring. Worked on designing the sensor integration and data flow architecture to ensure timely alerts for leakages, reducing water loss and infrastructure damage.
- Women Safety Analytics** - Created an analytics platform for women's safety using machine learning algorithms for gender detection, anomaly detection, and SOS gesture recognition. Integrated the system with hotspot mapping and SOS devices for real-time location sharing with authorities to enhance safety measures.

SKILLS

Web Development

IoT and Embedded Systems

Networking

Software Testing

Troubleshooting

PROJECTS

Smart Home Automation (2021 - 2023)

- Developed a Smart Home Automation system using Arduino and ESP8266, enabling features like smart door locking, appliance control, and a thief detection and reminder system, with a mobile app for remote management.

Shoe E-Commerce Website (06/2023 - 07/2023)

- Developed the front-end of a shoe e-commerce website, focusing on creating an intuitive and responsive user interface, product display, and seamless navigation for an optimal online shopping experience across devices.

Women Safety Analytics (03/2025 – 05/2025)

- Developed an AI-powered surveillance system using YOLO and CCTV integration for real-time threat detection. Additionally built a gesture-based SOS mobile app and a Smart Response Unit (SRU) to enable instant emergency alerts and rapid response, supported by dynamic hotspot mapping.

Client Projects (Ongoing)

- Collaborated with real-world clients on web development projects, delivering responsive and user-friendly interfaces. Focused on front-end development, client requirements gathering, and deployment of tailored digital solutions to meet business needs.

CERTIFICATES

Python Programming(Guvi ,Eduprep)

I gained a solid understanding of Python fundamentals, problem-solving techniques, and real-world application development.

IoT & AI certification(Pantech)

I completed **IoT & AI certification** by **Pantech**, which equipped me with practical skills in integrating IoT systems and understanding AI algorithms.

Ethical Hacking Course (Udemy 2024)

The Complete Ethical Hacking Course (2024): Zero to Hero on Udemy (June 8, 2024), where I learned fundamental to advanced ethical hacking techniques

Programming using Java

Infosys Springboard, IIT Bombay & Spoken Tutorial Earned certification in Java programming through Infosys Springboard and IIT Bombay & Spoken Tutorial, demonstrating proficiency in core Java concepts, object-oriented programming, and practical application development.

PROGRAMMING LANGUAGES

JAVA

Professional Working Proficiency

Python

Full Professional Proficiency

C

Full Professional Proficiency

Html,CSS,JS

Full Professional Proficiency
