Achievements & Awards

Rotaract Club of Hindusthan college of engineering and technology

Member-Rotary Year 2021-2022

Board Member (Professional Service Director) Rotary year 2023-2024

Languages

Tamil

English

OBJECTIVE

Analytical Professional with technical knowledge and critical thinking skills to thrive in data-driven environments .Tackles challenges with positivity and driven to overcome .Works great alone or with others and consistently exceeds expectations.

EXPERIENCE

Dagslore Technology solution

Embedded and IOT System

Evaluated differ hardware components like sensors, actuators, display, controllers for their compatibility with the embedded system architecture.

Enhanced project-based learning through the instruction of embedded and IoT working principles using application.

Enabling the foundations of IOT functions and making them easier to communicate

NCR Atleos Corporation

Test System Engineer

Developed and maintained automated test system for validation, production and quality assurance and also performed data acquisition, analysis and reporting for test results using excel or python tools.

Ensured traceability and compliance by maintaining test documentation, procedures and logs and also improved test accuracy by calibrating and validating measurement system to meet ISO Standards.

PROJECTS

Fire Alert Using Arduino IDE

Successfully detected flames and triggered alerts promptly.

Demonstrate the system's functionality in a controlled environment, ensuring reliable performance.

Smart Alert Health Monitoring System

Achieved a 90% accuracy rate in developing a Smart Alert Health Monitoring System using Arduino to continuously monitor vital health parameters and provide alert for any abnormal reading.

TOOLS

MATLAB

IntelliJ IDEA
