Academic Projects

○ Customized Handcrafted silk sarees platform

Tech Stack: HTML, CSS JAVASCRIPT, Mongo DB

"To create a visually appealing, user-friendly, this project is an online platform for handcrafted silk sarees specially designed for women. It allows users to select from a variety of silk materials, customize their own sarees, and even get AI-based suggestions based on their skin tone. The portal also empowers small-scale women artisans by letting them create accounts, upload their designs, and earn through direct sales. The aim is to blend traditional craftsmanship with modern technology to enhance customer experience and support local store."
