EDUCATION

B.Sc Renal Dialysis Technology
Dr. M.G.R. Educational and Research Institute
2021 - 2025

SKILLS

- Basic Computer Knowledge
- Good Communication
- Time Management
- Teamwork
- Adaptability
- Passionate

PROJECTS

Study on Treatment Adherence and Outcomes in End-Stage Renal Disease Patients

ACS Medical College and Hospital

- Analyzed the impact of treatment adherence on clinical outcomes of end-stage renal disease (ESRD) patients.
- Studied patient data to identify key factors influencing treatment success.
- Gained experience in data analysis, medical research methodologies, and report preparation.

STRENGTHS

- Good understanding of dialysis procedures, including Hemodialysis and Peritoneal Dialysis
- Ability to monitor patients during dialysis and identify early signs of complications
- Good interpersonal and communication skills for providing patient care and educating patients about treatment adherence
- Capable of working in a fast-paced, critical care environment with focus and precision
- Team player with the ability to collaborate with doctors, nurses, and technicians to provide optimal patient care

SUMMARY

Renal Dialysis Technologist with hands-on experience in hemodialysis, machine maintenance, and patient care. Skilled in infection control, patient monitoring, and safety protocols. Dedicated to providing safe, effective, and comfortable dialysis treatment while continuously enhancing technical expertise.
