English | Tamil

PROJECTS

GROCERY MANAGEMENT SYSTEM

Objective:

create a grocery store application with a login system and shopping cart functionality. Users can log in, browse available groceries, add items to their cart with specified quantities, and proceed to checkout. Upon checkout, an invoice is generated and displayed, and the user is thanked for their purchase

Role:

Design and implement the UI, authentication, cart logic, and invoice generation.

Technologies used:

Python (tkinter, Pillow, datetime), file handling, and image resources.

CERTIFICATES

- Completed python programming certification course
- Certificate of completing python course from IBM
