

VIJAY KANDHASAMY P

HARDWARE TEST ENGINEER

EDUCATION

B.E EEE – Hindustan college of Engineering and Technology – Coimbatore.

2019 – 2022

Secured 7.92 CGPA with strong theoretical knowledge and practical experience through projects and labs.

Diploma in EE – Arulmigu senthilandavar Polytechnic college - Tenkasi
2017 - 2019

Secured 77% in Diploma with solid theoretical understanding and practical experience through projects and labs.

WORK EXPERIENCE

Aishwarya Digitec Private Limited – Hardware Test Engineer

Jan 2023 – Jun 2025

- Experienced in **PCB circuit testing, debugging, and validation** to ensure product reliability and performance.
- Skilled in identifying and resolving hardware issues through systematic troubleshooting and analysis.
- Collaborated with cross-functional teams to support design verification and improve test processes.
- Performed functional and endurance testing to ensure compliance with design specifications and industry standards.
- Documented test procedures, results, and corrective actions to support product development and quality assurance.

KEY PROJECTS

- Tested and validated CNC machine control panel for functionality and reliability.
- Performed testing on water level controller systems to ensure accurate performance.
- Designed, developed, and tested temperature sensor circuits for embedded applications.
- Implemented CNC panel parameter display using 7-segment modules.
- Assembled and tested relay modules for control and protection circuits.
- Built and tested manual pulse generator for precision control applications.

SKILLS

PCB Testing & Debugging	100%
Soldering & Assembly Knowledge	100%
Schematics & Layout Reading	75%
Test Equipment Usage	75%
Power Analysis	60%

PROFILE

Profile Summary

Detail-oriented and proactive Embedded Hardware Test Engineer with 2.5 years of experience in PCB circuit testing, debugging, and validation. Skilled in using test equipment like oscilloscopes and logic analysers, analysing signal integrity, and troubleshooting hardware faults.

Strong knowledge of embedded systems, communication protocols, and power analysis, combined with hands-on experience in fault injection and stress testing. Adept at documenting test procedures, collaborating with cross-functional teams, and ensuring product reliability. Passionate about electronics projects, continuous learning, and problem-solving.
