Motivated and detail-oriented IT graduate with hands-on web development. alongside strong technical skills in HTML, CSS, JavaScript, and Java. Adept at automating tasks, Eager to apply analytical thinking and technical expertise to contribute to dynamic, technology-driven teams.

PROJECT UNDERGONE

Restaurant Order Management System - Java

- ◆ Built a system to manage restaurant orders, including menu display, order creation, updates, billing, and status tracking. Implemented CRUD operations, clean UI, and efficient data handling to improve restaurant workflow.
- ◆ Developed modules for menu display, order placement, and order status updates.Implemented add/update/delete functionality for items in an order.
Designed an intuitive interface to handle multiple tables and customer orders.Created a billing module for calculating total amount, taxes, and final invoice.Used form validations to ensure accurate order details.

E-Commerce Makeup Products Website

- ◆ Developed a responsive and user-friendly e-commerce frontend website for makeup and beauty products. The application includes product listing, filtering, product details, cart functionality, and a modern UI focused on improving user experience. Designed the interface using component-based architecture and implemented client-side routing for smooth navigation
- ◆ Built a clean and responsive UI using HTML, CSS, and JavaScript/React.
Developed product listing pages with search, filter, and category sorting features
Integrated a dynamic product details page with images, ratings, and descriptions..
