PROFILE

A productive problem solver with strong adaptability and collaboration skills. I deliver high-quality results with keen attention to detail and effective communication. Skilled in leadership and simplifying complex ideas to guide teams efficiently. Passionate about innovation and continuous learning to drive growth and excellence.

TECHNICAL SKILLS

- Programming
Languages: Python, SQL, HTML, CSS,excel
- Framework & Libraries:
flask, react
- Tools : Git, VScode, postman
- Concept: Embedded system, web development , VLSI

SOFT SKILLS

- Team Leading
- Easy Learning
- Problem Solving

INTERNSHIPS

- Completed an Embedded Systems and IoT training internship at AB Technology, Tirunelveli (July 10-16, 2023), gaining practical experience in hardware integration and IoT applications
- Completed a Python Development internship at Getin Technology, Virudhunagar (July 22-August 10, 2024), gaining hands-on experience in Python programming and project development.

EDUCATION

- **B.E / ECE**
Renganayagi Varatharaj College Of Engineering
Cgpa : 7.9
2021 - 2025
- **HSC**
Girls Govt higher secondary school, Thiruthangal
Percentage : 80%
2020 - 2021
- **SSLC**
Girls Govt higher secondary school, Thiruthangal
Percentage : 70%
2018 - 2019

PROJECTS

Smart Agriculture

- Developed a machine learning model to predict soil quality and daily agricultural product prices for better farming decisions.
- Processed and analyzed soil and market datasets using Python, Pandas, and Scikit-learn.
- Improved farmers' decision-making by providing accurate insights into soil health and market trends.

Job Portal Web App

- Developed a full-stack Job Portal Web App using HTML, CSS, JavaScript, and Flask with responsive design.
- Implemented RESTful APIs for secure user authentication and efficient job posting/application management
- Enabled seamless interaction between employers and job seekers, ensuring smooth and secure data handling.

Sales& customer web

- Developed a data-driven web application using React.js and Flask with RESTful APIs for seamless frontend-backend integration.
- Designed interactive dashboards to visualize sales trends and customer insights.
- Enabled real-time data analysis to enhance business decision-making and performance tracking
