

SUMMARY

Detail-oriented Data Analyst with strong expertise in Excel, SQL, Python, Tableau, and Power BI. Skilled at analyzing complex datasets, creating interactive dashboards, and deriving insights to support business decision-making. Hands-on experience with data cleaning, visualization, statistical analysis, and reporting. Adept at solving problems using data and delivering actionable insights that improve business performance.

EDUCATION

B.sc Mathematics (MAR GREGORIOS COLLEGE,2021) | [CERTIFICATE](#)

SKILLS

Data Analysis Tools: Excel (Advanced formulas, Pivot Tables, VBA), Power BI, Tableau

Programming & Analytics: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, Joins, Subqueries)

Database Management: MySQL, SQL Server, **Data Visualization:** Interactive dashboards, KPI reports, trend analysis

Statistical Methods: Hypothesis testing, Regression, Classification, Forecasting

Other Tools: Jupyter Notebook, Anaconda, GitHub

Soft Skills: Problem-Solving | Communication | Teamwork | Adaptability | Time Management | Critical Thinking | Presentation Skills.

PROJECT

Excel Project – Mobile Store | [GitHub](#)

Designed an Excel-based reporting system to track sales, revenue, and inventory. Automated reports with Pivot Tables & Charts to improve monthly sales tracking.

SQL Project – Bike Superstore | [GitHub](#)

Used MySQL to clean, transform, and analyze transactional data. Developed complex queries (Joins, Subqueries, Grouping) to extract sales and customer insights.

Power BI Project – Bike Superstore Dashboard | [GitHub](#)

Built an interactive dashboard to visualize sales by product, location, and customer segment. Delivered insights that improved revenue forecasting and performance monitoring.

Tableau Projects – Geographical, Product & Customer Overview | [GitHub](#)

Created 3 dashboards for sales trends by location, product, and customer segments. Helped decisionmakers track KPIs, discounts, and profit margins.

Python Projects – Walmart Sales Analysis | [GitHub](#)

Performed Exploratory Data Analysis (EDA) on Walmart sales dataset. Cleaned and transformed raw data, identified key factors affecting sales, and applied statistical methods to analyze seasonal trends. Built predictive models to forecast sales and improve inventory planning.

EXPERIENCE

Yadgreen Agricultural Co - Data Analyst Intern | Completed a two-month internship in data analytics using Excel, SQL, Power BI, and Tableau. Performed EDA and built dashboards to visualize insights from real-world datasets

Coastal Rubber Industries – Data Entry (6 months) | Entered and maintained accurate records of company data.

Annai Grocery Store – Billing & Maintenance (2 ½ Years) | Managed daily billing operations and customer transactions.

CERTIFICATE

Data Analytics - Yadgreen Agricultural Co. NOV 2025 | [CERTIFICATE](#)

Advance Excel, SQL , Power BI, Tableau ,Python for DS – IT Vedant. SEPT 2025 | [CERTIFICATE](#)
