PROFILE SUMMARY

B.Tech graduate in Electrical and Electronics Engineering with hands-on experience in solar energy systems, electric vehicle technology, and automation projects. Currently pursuing Advanced Full Stack Development training with strong fundamentals in Core Java, MySQL, HTML, and CSS. Demonstrated ability to work in technical teams, manage time effectively, and apply engineering concepts to real-world projects. Seeking entry-level roles or internships in engineering, software, or technology-driven environments.

EDUCATION

- **B.Tech – Electrical and Electronics Engineering**
B.S. Abdur Rahman Crescent Institute of Science and Technology, Chennai
|2021-2025 CGPA: 7.52
- **Class XII** – MES Razeena Matriculation Higher Secondary School (2021) – 76%
- **Class X** – MES Razeena Matriculation School (2019) – 70%

SKILLS

- **Programming & Development:**
Core Java (OOP Concepts, Inheritance, Loops, Threads, Objects)
HTML (Tags, Lists, Forms, Audio/Video Embedding)
CSS, CSS3
- **Tools & Software:**
MS Office, MATLAB Simulink, PowerPoint
- **Database:**
MySQL (Queries, Joins, CRUD Operations, Database Design)

INTERNSHIPS & EXPERIENCE

Airport Authority of India (AAI) – Intern, CNS Department
June 2024

- Gained exposure to Communication, Navigation, and Surveillance (CNS) systems used in air traffic management.
- Learned the working principles of radar systems, navigation aids, and aviation communication networks.
- Understood the importance of system reliability, safety standards, and precision in critical infrastructure.

National Small Industries Corporation (NSIC) – Intern, Electric Vehicle Technology
July 2023

- Received hands-on training in electric vehicle technology, including motor drives and battery management systems.
- Learned power electronics integration in EV applications and basic EV maintenance techniques.
- Gained insights into MSME/startup support, business incubation, and green mobility initiatives.

PROJECTS

Portable Solar Tree | Jan 2025 – Apr 2025

- Designed and developed a portable solar power system with a dual-axis solar tracking mechanism.
- Implemented 360-degree yaw rotation and pitch control to maximize solar energy harvesting.
- Integrated a Zeta converter to deliver stable 5V DC output for practical applications.
- Developed a lightweight and portable structure suitable for off-grid, rural, and disaster management use cases.

Fire Fighting Robot | May 2024

- Designed and built an intelligent robotic system for fire detection and suppression.
- Integrated flame and smoke sensors for accurate fire detection.
- Implemented autonomous navigation as well as manual/remote control modes.
- Reduced human risk in hazardous environments and improved fire safety response.

CERTIFICATIONS

- Cambridge English Business Certificate (BEC – Preliminary)
- NPTEL – Social Innovation in Industry 4.0
- INFOSYS-forensic analysis:cyber investigations
- Java Full Stack Development – Besant Technologies
 - Core Java (Backend & OOP)
 - MySQL (Database Management)
 - HTML, CSS, CSS3 (Frontend Development)

Achievement:

- Secured Best Paper Award – National Conference for Portable Solar Tree Project
