

PROFILE INFO

Detail-oriented and organized Data Annotator with 2+ years of experience in annotating large datasets for machine learning model training. Skilled in data annotation techniques and tools, including Amazon SageMaker Ground Truth. Proven track record of delivering high-quality training data and improving model accuracy. Strong understanding of machine learning concepts and data requirements.

SKILLS

- Data Annotation Skills
- Amazon SageMaker Ground truth
- Machine learning and AI Model training
- Data Quality Control
- Data Labeling
- Video and Audio annotation
- My SQL,Postgresql
- MS excel & office
- C and C++
- Content writing
- Technical Writting

LANGUAGES

- English
- Tamil

Karur

EDUCATION

2017	VIVEKANANDA VIDYALAYA MATRIC HIGHER
2018	SECONDARY SCHOOL
	Percentage : 64.33%
2018	Bachelor of Engineering
2022	VSB Engineering College, Karur
	Mechanical Engineering
	GPA: 7.84

EXPERIENCE

MAY	Analyst
2023	Objectways Technology
AUG	
2025	• Worked as an Analyst with 2+ year of valuable hands-on experience at Objectways technologies • Specialising in Natural Language Processing (NLP) and Computer Vision (CV) projects is used for advanced machine learning and artificial intelligence and wants to make artificial intelligence at medical.Computer vision projects using tools like Lidar,2D Annotations • Skilled in data labeling and annotation techniques to ensure high quality and accurate datasets for machine learning models • A collaborative team player with a strong attention to detail, I am passionate to solve complex problems in the data-driven Industry.
SEP	Indian Operator 1
2025	Uber India Systems Private Limited
PRESENT	• Woring as an Indian Operator 1 with 2 months of experience at Uber India System Private Limited • Specialising in Human face Identifier • Utilized proprietary face recognition technology to accurately identify and verify human faces from images and videos • Analyzed facial features and matched them with existing databases to provide high-quality output • Collaborated with team members to improve process efficiency and accuracy, resulting in [desirable outcome] • Demonstrated expertise in face recognition algorithms and technologies, including [specific technologies]
