PROJECT

AI AND IOT BASED SMART ASSISTIVE MULTIFUNCTIONAL GLOVE

- This project is about making a smart glove for visually impaired people.
 - The glove uses Artificial Intelligence (AI) and Internet of Things (IoT) to help users move around safely.
 - It can detect obstacles, recognize objects or faces, and give voice messages to the user.
 - The glove also has a GPS and emergency button to send alerts if needed.
 - With the help of sensors and smart technology, this glove makes life easier and safer for people who cannot see well
