

HARIHARAN.S

QA TEST ENGINEER

E-Mail: hariharanselvam002@gmail.com

Mobile: +91 9787635574

Professional Summary

I have 3 years of experience in automation and manual testing, with expertise in Py Test, Core Java, Selenium Web -driver, TestNG, JavaScript, API testing, and UI testing. Experienced in testing web applications, I have developed and maintained automation frameworks and performed end-to-end functional, regression, and API testing. I actively participate in Agile ceremonies and have strong problem-solving skills with the ability to mentor junior QA team members.

TECHNICAL SKILLS

Programming Languages	: HTML, CSS, Core Java.
Manual Testing	: Functional Testing, Regression Testing, Smoke Testing.
Automation Testing	: Selenium, Pytest, Test NG, POM, Data-Driven.
API Testing	: Postman.
Tools	: JIRA, Plane, Click up.
Development Environments	: Eclipse, Visual Studio Code.

EXPERIENCE

Bot Bridge Technologies – Chennai – QA Test Engineer

Nov 2023 - Present

- **Automation Leadership:** Spearheaded automation for LIMS, increasing test coverage by 30% and enhancing test reliability.
- **Script Development:** Developed and maintained automation scripts using Selenium Web-driver and Java, reducing manual testing effort by 40%.
- **Agile Management:** Utilized Agile methodologies for sprint management and deliverable tracking via JIRA, improving team efficiency and project outcomes.

PROJECTS

1. LIMS (Laboratory Information Management System) - Raffles Medical Group, Singapore

Automation and Manual Testing | Nov 2023 - Present

Project Overview:

LIMS is crucial for managing lab operations, patient data, and test scheduling for Raffles Medical Group.

Key Achievements:

- **Thorough Testing:** Conducted extensive manual testing to validate that all business and technical requirements were met.
- **Efficient Bug Tracking:** Utilized Click-up for bug tracking, effectively managing

issue resolution and communication with the client and development team.

Roles & Responsibilities:

- **Testing Environment:** Performed testing via Virtual Desktop Infrastructure (VDI) using FortiClient to ensure secure and reliable access.
- **Bug Management:** Acknowledged and tested bugs reported via Click-up, communicated with developers to resolve issues, and updated the status from "Dev Completed" to "QA Completed" in Click-up.
- **Collaboration:** Coordinated with developers and stakeholders to ensure timely defect resolution and system stability.

2. Mobile App – Rider App & Doctor Availability App

Manual Testing | Nov 2023 - May 2024

Key Achievements:

- **Performance Boost:** Led manual testing, improving app performance and user satisfaction by 20%.

Roles & Responsibilities:

- **Test Execution:** Executed detailed manual tests for mobile app features, enhancing app stability and functionality.
- **Feedback Provision:** Provided actionable feedback to developers, leading to significant performance improvements.

Amphisoft Technologies – Coimbatore - Software Test Engineer

Sept 2022 - Oct 2023

- **Test Automation:** Developed and automated tests for E-Box, enhancing efficiency and consistency.
- **Collaboration:** Coordinated with developers for issue resolution and improved user experience.
- **Documentation:** Managed detailed test records and defect tracking.

PROJECTS: E-Box Sept 2022 - Oct 2023

- Led testing and automation for new content, improving functionality and efficiency.
- Performed functional, regression, and smoke testing for laboratory inventory workflows.
- Automated stock management and reorder workflows using Selenium & JavaScript.
- Validated real-time inventory tracking and threshold alerts for reagents and consumables.
- Performed data-driven testing using Excel/CSV datasets to simulate inventory conditions.
- Verified role-based access and approval workflows for item creation and consumption.
- Collaborated with the development team to validate API endpoints for inventory transactions.
- Conducted sanity checks after every code merge in pre-production environments.
