In recognition of Platinum Standard Operational Performance.
- **Junior Grade Typewriting (English – Lower)** **May 2017 - Aug 2017**
Directorate of Technical Education, Tamil Nadu Government (30 WPM, First Class)

Skills

- Programming Languages : Python (NumPy, Pandas)
- Database : SQL (Joins, Subqueries)
- Data Visualization : Power BI (DAX, Pivot Tables)
- Data Analysis : Excel (Data Cleaning, VLOOKUP, HLOOKUP)
- Soft Skills : Analytical Thinking, Attention to Detail, Time Management, Punctuality, Project Management, Adaptability

Projects

Coffee Sales Analysis [Data Report - Oct 2025](#)

- Used data insights to understand top-selling coffee types and optimize inventory planning.
- Compared sales performance across seasons to evaluate demand fluctuations and revenue impact.
- Visualized sales metrics using charts (line, bar, pie) for clearer business insights.

- Analyzed customer purchase pattern to identify popular products and sales trends.
- Prepared sales reports and dashboards to support business decision-making.
- Enhanced customer satisfaction while driving higher sales and business growth.
- Identified under performing products and recommended data-driven improvements.
- Reduced stock shortages and overstock situations through demand-based analysis.
- Improved sales forecasting accuracy using historical data trends.
- Tools: **Python** (NumPy, Pandas, Matplotlib, Seaborn and Power BI Dashboard)

Cafe Sales Analysis [Data Report - Jul2025](#)

- Analyzed cafe sales data to identify daily, weekly, and monthly revenue trends.
- Tracked best-selling and least-selling items to support menu optimization.
- Identified seasonal variations to improve inventory and staffing management.
- Suggested data-driven improvements to enhance overall sales strategy.
- Improved menu planning and pricing decisions.
- Increased revenue through effective sales strategies.
- Tools: **Excel, Power BI and Dashboard**

Health Care [Data Report - Jul2025](#)

- Analyzed patients' overall health to identify medical risks and support accurate diagnosis and treatment planning.
- Identified potential medical risks based on patient history and clinical indicators.
- Supported accurate diagnosis and effective treatment planning through data analysis.
- Assisted in preparing healthcare reports and summaries for clinical review.
- Improved data quality by detecting and correcting inconsistencies in patient records.
- Enabled faster clinical decision-making clear and well-structured reports.
- Tools: **Excel, Power Query, Pivot Tables and Dashboard.**

Education _____

Bachelor of Science – Mathematics

Cauvery College for Women at Trichy

Experience _____

Swathi Technology, Trichy – Data Processing Associate (L&T Finance and Yes Bank)

- Processed L&T Finance customer application forms and entered accurate data into company systems.
- Verified and validated customer details to ensure correctness before final submission.
