Projects :

- ANIMALS DISEASES AND DIAGNOSIS January
- 2024-March 2024
- The project "Animal Disease and Diagnosis focuses on investigating various diseases affecting animals and exploring effective diagnostic methods. The project aims to deepen understanding of the causes, symptoms, and transmission patterns of animal diseases, as well as the development and application of diagnostic techniques for their detection. By analyzing and synthesizing current research and clinical data, the project seeks to contribute to the advancement of veterinary medicine and animal welfare. The findings of this project are intended to inform veterinary professionals, researchers, and policymakers, ultimately leading to improved disease management and better outcomes for animal populations.

Activities :

- NCC
- Certificate in naan mudhalvan
