PROFESSIONAL SUMMARY

Detail-oriented and analytical recent graduate with a strong foundation in data analysis, and business intelligence. Proficient in Excel, SQL, and data visualization tools like Power BI. Skilled in cleaning, analyzing, and interpreting data to support decision-making and solve real-world problems. Passionate about transforming raw data into actionable insights. Eager to contribute to data-driven teams and grow as a Data Analyst in a dynamic organization.

EDUCATION

SSLC - RMK Patashaala CBSE , 2019

HSC - Infant Jesus Matriculation Higher Secondary School , 2021

Degree - Bachelor of Commerce | Vel Tech University , 2024

PROJECTS

Churn Data Analysis

- Analyzed customer behavior, engagement patterns, and transaction data to identify churn risk segments.
- Performed data cleaning and preprocessing by handling missing values, removing duplicates, and treating outliers.
- Conducted exploratory data analysis (EDA) and visualized churn trends using Python (Pandas, Matplotlib, Seaborn).
- Built and evaluated predictive churn models using machine learning algorithms such as Logistic Regression and Random Forest.
- Identified key factors driving customer churn through feature importance and correlation analysis.
- Proposed data-driven retention strategies like personalized offers and loyalty programs to reduce churn and increase customer satisfaction.

Sales Performance Dashboard

- Collected and preprocessed raw sales data using Python (Pandas, NumPy) to ensure data accuracy and consistency.
- Performed exploratory data analysis (EDA) to identify sales trends, seasonal patterns, and customer purchase behavior.
- Automated data cleaning and transformation workflows in Python to streamline reporting updates.
- Built interactive dashboards in Power BI with slicers, drill-through features, and KPIs (Revenue, Profit Margin, Sales Growth).
- Integrated Python visuals in Power BI for advanced analytics including forecasting and anomaly detection.
- Delivered insights that improved decision-making related to product performance, pricing strategy, and target customer segments.

EXPERTISE

Programming & Data Analysis : Python , SQL

Data Visualization & BI Tools : Power BI, Excel

Database Management : SQL queries, Joins, subqueries, Stored Procedures , Views and Index

Reporting & Dashboarding : Power BI dashboard creation, dynamic filtering, DAX functions

Data Processing & Cleaning : Data wrangling, ETL processes, missing value handling

Soft Skills : Strong Communication Skills , Problem-Solving and Analytical Thinking , Time Management & Prioritization , Presentation and Reporting Skills

CERTIFICATE

Certified Data Analysis In **ZUKUN ACADEMY** , completed on September 30 2025

Python Basic Completion In **INFOSYS SPRING** (ONLINE) , completed on June 2025
