Skills

- Java
- Javascript
- MySql
- React
- Mongodb
- Basics of Testing (Selenium)
- Python(Basics)
- Basics of AWS(EC2,SNS,S3,RDS)

Projects

- **Sports Organisation Platform**
It is a web-based system for college students to register and participate in sports events. Built with HTML, CSS, JavaScript , and powered by Java, Spring Boot, and MySQL , it allows students to sign up, log in, and register for events like cricket, volleyball, and football. It also provides past event statistics for performance insights and a feedback system to enhance the experience. This project simplifies event management and encourages student participation in sports.
