SUMMARY

B.Tech student specializing in Artificial Intelligence with hands-on experience in cybersecurity, web security testing, and automation. Skilled in Kali Linux, Burp Suite, Katana, and Dalfox for vulnerability analysis and penetration testing. Proficient in Java and Python for developing automation scripts and security tools. Passionate about ethical hacking, system security, and building automated solutions to detect and prevent cyber threats.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

Anna University, Tamil Nadu

Kings Engineering College, Kanchipuram

Relevant coursework: VAPT, Machine Learning, Artificial Intelligence, Data Science

Graduating April 2026

8.24 CGPA

TECHNICAL SKILLS

Bug Bounty: Burpsuite, Wireshark, Nmap, Sqlmap, Katana, Dalfox

Web Development: Spring Boot, Bootstrap, JavaScript

Programming: Python, C, Java, GoLang, JavaScript, SQL, HTML&CSS

Certifications: Cyber Job Simulation (Deloitte) – July 2025, Information Security Fundamentals (Udemy) - February 2025, Mastering Ethical Hacking (Infosys Springboard) - October 2024, Mitre ATTCK Framework (Cybrary) - September 2024

ACHIEVEMENTS

Codec Technologies, Online: Cyber Security Intern

July 2025 – October 2025

- Conducted vulnerability assessments and simulated ransomware attacks in a controlled environment.
- Gained hands-on experience in malware analysis, encryption, and ethical cybersecurity practices.

Codec Technologies, Online: Defence Hacker Intern

April 2025 - June 2025

- Defense Hacker Internship covering ethical hacking, network and system security, cryptography, and threat intelligence.
- Acquired practical skills in penetration testing, social engineering, and red teaming methodologies.

ACADEMIC PROJECTS

Automated ATM Security Enhancement using OpenCV and IoT

Developed a real-time suspicious activity monitoring system for ATM security.

- Built a real-time suspicious activity monitoring system for ATM security.
- Integrated IoT devices for alerting unauthorized access.
- Tech Stack: Python, OpenCV, TensorFlow, PyAudio, Arduino, IoT protocols.

E-commerce Website for Car Shop

Led the design and development of a scalable online car shop platform.

- Developed a responsive car shop website using Spring Boot and Java.
- Created REST APIs for inventory and order management.
- Tech Stack: Spring Boot, Java, MySQL, HTML, CSS, JavaScript, REST APIs.

OTHER WORK EXPERIENCE

KEC AI Club, Chennai: AI Project Demonstrator

August 2025

- Demonstrated the Automated ATM Security Enhancement project integrating OpenCV and IoT in front of 250+ attendees.

SIH, Chennai: Team Leader

October 2025

- Managed a team of 5 members to solve Kochi Metro Limited (KML) scheduling problem using n8n automation.

Bug Reporting, :

- Identify, analyze, and report security vulnerabilities in websites to help improve their security posture.
