PROJECTS

Agrio App Designer

Jun-2025/Aug-2025

- Designed a farmer-focused mobile application to help users track crop health, access market prices, and receive weather updates.
- Conducted user research with farmers to understand challenges in crop management and market access.
- Created wireframes and interactive prototypes using Figma, ensuring a simple and intuitive interface for rural users.
- Developed iconography, color schemes, and typography tailored for visibility in outdoor conditions.
- Collaborated with developers to ensure UI designs matched technical feasibility.
