PROJECT

1.Hospital Booking From

- Developed a web-based application for patients to book appointments with doctors online.
- Patients can select department, doctor, date, and time for booking.
- Provides login & signup functionality for patients and hospital staff
- Doctors' availability is displayed in real-time to avoid overlapping appointments.
- Includes a form validation system (checks mandatory fields, correct input format, etc.).
- Patients receive a confirmation message/email after successful booking.

2. Online House Booking System

- Implemented features like user login, property listing, and booking system
- Developed responsive UI using HTML, CSS, and Bootstrap.
- Built a full-stack application using Java, Spring Boot, and MySQL.
