---

## PROFILE SUMMARY

Ambitious and detail-oriented fresher with basic knowledge of SQL, Python and Power BI. Eager to learn and grow in a data analyst role, leveraging analytical skills to drive business insights.

---

## PROJECTS

### Smart traffic light system

Feb 2025 - May 2025

**Tech Skills** - Python, Yolo V11, Emergency vehicle Detection, Vehicle counting, Dynamic signal control

- develop a smart Traffic light system leveraging yolo v11 for detection of vehicles and emergency vehicles like ambulance.
  - The system integrates two yolo V11 models: one for emergency vehicles detection and another for vehicle detection and counting.
  - A web based simulation of a four way road junction is developed, where signals are dynamically controlled based on a real-time input image.
  - This system dynamically controls the signal timings based on the density and ensures priority for by automatically switching.
- 

## EDUCATION

B.Tech - IT, CGP -8. 21, Rase college of engineering ( 2022 to 2025)

Diploma - EEE , Per - 89% - Government Polytechnic college ( 2018 to 2020)

---

## CERTIFICATION

- Python 101 for Data science
- Data Analytics Certification
