Profile

A highly Motivated and Passionate about software development, Eager to apply my Skills in designing and building innovative software solutions while continuously learning new technologies. Seeking a responsible role in a reputable organization where I can contribute to impactful projects and grow successfully.

Education

B.E., Computer Science and Engineering, University College of Engineering, Arni CGPA-7.89	2024
HSC, Government Higher Secondary School, S.V. Nagaram PERCENTAGE-67%	2020
SSLC, Government Higher Secondary School, S.V. Nagaram PERCENTAGE-81%	2018

Projects

Fake News Detection on Social Media using Machine Learning This project is detect fake news on social media platforms using machine learning techniques. This system will analyze textual content, user interactions, and other relevant features to determine the credibility of news articles and flag potential misinformation.	2024/03 – 2024/05
Face Recognition Attendance System using Python This project is designed to automate the process of attendance marking using facial recognition technology. This system simplifies attendance management by capturing a person's face, identifying them by comparing the captured image with pre-stored facial data, and marking their attendance automatically.	2023/02 – 2023/05
Advanced COVID-19 Detection from Lung X-rays using Machine Learning This project is detect COVID-19 from lung X-ray images using advanced machine learning technique. This approach analyze X-rays and identify signs of COVID-19, enhancing diagnostic accuracy and speed.	2023/02 – 2023/04
