235/A, Kakkancolony, Thiruvermbur, Trichy-13

## Objective

---

Aspiring Site Reliability Engineer with strong foundations in cloud infrastructure, Linux systems, networking, and automation. Skilled in Python, Shell scripting fundamentals, and performance monitoring. Eager to contribute to fast-paced SRE and DevOps environments by building scalable, reliable, and secure systems. Committed to continuous learning and delivering high-quality solutions.

## Education

---

|                                                                                                                                           |            |
|-------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>K. Ramakrishnan College of Engineering</b><br>Bachelor of Engineering — Electronics and Communication Engineering<br><b>CGPA: 6.81</b> | 14/08/2025 |
| <b>Chellammal Matriculation Higher Secondary School</b><br>HSC — 67%                                                                      | 19/07/2021 |
| <b>RSK Higher Secondary School</b><br>SSLC — 52%                                                                                          | 06/05/2019 |

## Technical Skills

---

**Cloud Infrastructure:** AWS Cloud Practitioner (Certified), cloud networking fundamentals, IAM basics, VPC concepts, infrastructure monitoring, capacity analysis

**Scripting Automation:** Python (Intermediate), Shell/Bash scripting (Beginner), automation using scripting tools

**Operating Systems:** Linux (Intermediate) — log analysis, system monitoring, process management, user/admin commands

**Networking Tools:** TCP/IP, Subnetting, Routing, DNS, DHCP; ping, traceroute, netstat, ssh, scp, nc, tcpdump, Wireshark

**Programming Languages:** Python, Java, C (Intermediate)

**Additional Skills:** IoT systems, basic electrical wiring, control panel drafting

## Soft Skills

---

Problem Solving, Analytical Thinking, Communication Skills, Teamwork, Leadership, Time Management, Critical Thinking

## Certificates

---

- AWS Cloud Practitioner Certificate
- Google Cloud Certificate
- Salesforce Administrator Virtual Internship Certificate
- NPTEL — Deep Learning
- Internet of Things Certification
- Workshop: “Innovative Electronics” conducted by LIFT INDIA

## Project

---

### Intelligent Landslide Monitoring and Prevention System (IoT-Based)

Developed an IoT-based real-time landslide monitoring solution using geophone sensors (SM-S nodes) to capture microseismic vibrations. Implemented data acquisition logic, anomaly detection, and alerting mechanisms to enhance reliability and prediction accuracy. Gained hands-on experience with system integration, monitoring concepts, and real-time data flow.

## Internship

---

CRI Pumps Pvt Ltd

3 Months

- Assisted in designing and drafting industrial pump control panels following engineering and safety standards.
- Performed wiring, component selection, troubleshooting, and system-level inspection to ensure reliability.
- Interpreted electrical diagrams and optimized workflow for improved accuracy and efficiency.
- Gained exposure to IoT sensors, data acquisition systems, and hardware diagnostics.

## Experience

---

Developed hands-on experience in Linux systems, networking fundamentals, incident investigation, and hardware-software coordination. Strengthened skills in automation, documentation, and performance monitoring through real-world project involvement. Willing to work in rotational shifts to support 24×7 system operations.

## Extra-Curricular Activities

---

- Football Team Captain
- Winner — Chief Minister Trophy (District-Level Football Competition, 2024)
- Completed coding challenges on HackerRank and SkillRack
