Vimal Pradeep

Email Marketing Executive

SUMMARY

Email Marketing Executive with over 2 years of experience in executing end-to-end digital campaigns, with a focus on LinkedIn survey development, marketing automation, and email campaign management. Skilled in managing campaign assets through Wrike and proficient in platforms like Oracle Responsys, Adobe Marketo, and Oracle Eloqua. Demonstrated expertise in creating surveys, landing pages, responsive emails, and implementing effective segmentation strategies to enhance campaign performance and engagement.

Professional Experience

Verticurl Marketing Pvt Ltd - Coimbatore, Tamil Nadu.
(02/2022 - 04/ 2024)

Associate Engineer - Technology

PROJECT: 1

LinkedIn - Research Ops AdEfx.

- In Research Operations, responsible for creating surveys and email campaigns based on client requirements.
- Proficient in developing surveys and generating reports using OKTA Decipher, building email campaigns and landing pages through Oracle Responsys,
- And managing client communications via LinkedIn and Wrike.

ROLES AND RESPONSIBILITIES:

- Initially, I log in to the Project Management Tool (Wrike) and download the Asset Brief from the respective project folder shared by the client. I then review all task details thoroughly.
- Once the asset is received, I begin creating the programmatic surveys from scratch and perform a test run of the program.
- After completing the survey, I develop the naming conventions based on the specific country and language.
- Following that, I create the email campaign consisting of four modules.
- Finally, I perform QA on all assets and share both the test links and naming conventions through the client portal.

Project: 2 - Splunk

- Utilized marketing automation tools such as **Adobe Marketo** and **Oracle Eloqua** to create responsive emails, landing pages, forms, segmentation, email invitations, and webinar invites.
- Managed end-to-end production of client email campaigns, including creative template design and execution.
- Prepared target contact lists based on client requirements using advanced segmentation criteria.
- Perform **A/B testing** across campaigns to optimize performance and improve engagement metrics
- Manage Campaign Creation, Setup and Deployment.
