PROFILE

Aspiring front-end developer and I have worked on multiple web development projects. By leveraging my skills in HTML, CSS, JavaScript, and React, I successfully built responsive and user friendly website.

PROJECTS

E-commerce Website

Html,css & javascript

- Objective: An eCommerce website enables businesses to sell products or services online, providing a convenient shopping experience for customers. It also helps businesses expand their reach, improve efficiency, and drive growth.
- Front-end: Designed a visually appealing and responsive interface using HTML and CSS.
- The website features a nature-inspired theme with vibrant visuals, a user-friendly layout to showcase various plant products and gardening tools experience.

Web Application

Html, css & javascript

- Description Designed and developed application to help users efficiently manage and track their daily tasks and deadlines in real time.
- Functionality: Integrated local storage to persist user data and ensure tasks remain accessible across sessions.
