Profile Summary

Java Developer with 7 months of experience in Full stack java development. Skilled in Java programming, backend integration, and deploying code via Jenkins. and Skilled in system troubleshooting, maintenance, and optimizing IT infrastructure to ensure smooth operations and minimal downtime.

Technical Skills

- Languages: Java , SQL , JavaScript , HTML , CSS
- Technologies & Tools: Jenkins , Github, Linux(Kali,Ubuntu), Cisco, AWS, VMware, Jira, Virtualization.
- Frameworks : React , Angular , Spring , Hibernate

Education

- UG–Year – 2020 – 2023 | CGPA – 7 | Department – Information Technology
 - College Name – Government College of Technology,Coimbatore
- Diploma | Year– 2017-2020 | Percentage – 95%
 - College Name – Muthayammal Polytechnic College,Rasipuram

- 10th Grade | Year – 2017 | Percentage – 84%
- School Name – South Indian Matric.Hr.Sec School, P.Kalipatty

Experience

- Java Fullstack Developer At Exterro -2023
- System hardware and Network engineer At KJS – 2024(10 Months)

Certification & Training

- Cyber security
- Cisco
- Full Stack Web Development Using MERN stack at STUMONK - 2023
- JAVA Fullstack Development at ACTE Technologies - 2025

Additional Achievement

- First place in national level symposium CYBER ATTACK AND SECURITY. Held at SSM Polytechnic College.
- First place in State Level Symposium on BIG DATA,Held at Sakthi PolytechnicCollege.
- Second place in college Level Window based application –**Student Management System**

Project Details

Project Briefing – Library Management System Year – 2024

Roles and Responsibility –

- Designed and implemented the backend using **Java** and **Spring Framework** for building RESTful APIs and handling business logic.
- Utilized **Hibernate** for ORM-based interaction with the relational database, ensuring efficient data management and retrieval.

- Implemented **SQL** queries for managing the database of books, users, and transactions.
- Developed user-friendly frontend features using **JavaScript** to provide a seamless interaction for library users, including searching books, borrowing, and returning them.
- Integrated **Spring Security** to handle user authentication and authorization, ensuring secure access to library resources.
- Integrated **Apache Solr** to enable fast and scalable full-text search for books, authors, and genres, providing an enhanced search experience.

Key Features:

- User Registration & Authentication.
- Book Search, Borrow, and Return functionalities.
- Transaction History tracking.
- Admin functionalities for adding/removing books, managing user data, and overseeing transactions.

Project Details

Project Briefing – **ChitFund Management**

Year – 2024

Roles and Responsibility –

- Developed a **Chit Fund Management System** to streamline the operations of a chit fund, ensuring secure and efficient management of member subscriptions, auctions, payments, and withdrawals. Built using **Core Java, Spring, Spring Security, and Hibernate**, the system provides role-based access control and secure authentication.
- It enables fund administrators to create and manage chit fund groups, register members, schedule auctions, track payments, and generate reports. Hibernate ensures seamless database interactions, while Spring Security enforces robust user authentication and authorization.

Project Details

Project Briefing – **FeedBack System**

Year – 2024

Roles and Responsibility –

- Developed a feedback system that allows users to submit feedback multiple times during their session.
- The system securely stores user details in **cookies**, ensuring data privacy and session persistence. Implemented the backend using **Java** and **Spring Security** for authentication and authorization, while **MySQL** handles the structured storage of feedback data. The encryption mechanism ensures that user data remains secure throughout the session.
